

Behavioral Questions (BQ) Rounds

MLE / Software Eng

Content

- Behavioral Round 簡介
- Behavioral Script
 - 建立人設
 - 金句
 - Framework
 - STAR
 - Point form
 - 最佳時長
- Amazon Leadership Principles
 - Experience to show
- Build your Script
- 如何練習
 - Chatgpt 訓練
 - Voice 對練
- 總結: Focuses

Behavioral Round 簡介

- 個人題
 - Self Intro, Strength, Weakness
- Experience 導向題
 - Tell me about a time you ...
- General 情景題
 - If you encounter this, what will you do?
- 無里頭題
 - How do you keep yourself up to date?

最大差別：你有經歷過嗎
答題方式不一樣

Behavioral Script

Behavioral Script

- 絕大部分Interview都是Remote
- 一定要準備Script / Cheap Sheet
 - 減低出錯機率
 - 最好口語化, 照讀即可
- 切忌準備太多題目, 會亂
- 目標: 練到不用cheat sheet
 - Cheat sheet 作backup

目 分頁 1

Build your script

建立人設

- Interview 只是表演
- 先問自己：
 - 低級: Who are you?
 - 中級: What are you good at?
 - 高級: 你想給人一個什麼印象?
- 想一個主題, 回答similar問題時盡量緊扣主題
 - Be Consistent
 - 洗腦式向interviewer傳遞你的人設
 - 注意相同性質問題, 答案應Consistent, 如
 - What is your strength?
 - Why should we hire you?
 - What sets you apart from other candidates?

建立人設: 例子

- 人設
 - **MLE that brings real impact**
 - **Good at Planning and Detail Oriented**
- Q: What is your strength?
 - Good at Planning + Example from previous experience
- Q: Tell me about a time when you had to handle a project with a tight deadline
 - One of the tightest deadlines I faced was at OOCL when I was tasked with building a data pipeline for a cargo forecasting model in just two weeks. One teammate had unexpectedly left, and I was still ramping up on the logistics side
 - I started by dividing the project into critical phases—data extraction, transformation, and loading—**assigning mini-deadlines for each phase to ensure steady progress**. I also set up check-ins with logistics experts to clarify details quickly, keeping me on track despite the steep learning curve
 - **This planning let me prioritize what mattered most, deliver the pipeline on time**, and create a scalable base for future improvements
- 時刻緊扣人設

個人題

Tech公司個人題常見題目

- Self-Introduction:
 - Tell me about yourself
 - Walk me through your resume
 - Why are you interested in this role/company?
- Strengths:
 - What are your greatest strengths?
 - How do your strengths make you a good fit for this role?
- Weaknesses:
 - What is your greatest weakness?
 - How do you ensure that your weaknesses don't impact your performance?
- Work Style and Personality:
 - How would your colleagues describe you?
 - What motivates you in your work?
 - How do you handle stress or pressure?
- Values and Vision:
 - What are your core values?
 - Where do you see yourself in 5 years?
 - What does success mean to you?
 - What legacy do you want to leave in your professional life?

建立人設: 利用金句 (Strong Statement)

- **Assumption**: Interviewer working overtime to interview you
 - 大部份人都不專心, 想快點完
 - Interviewer 大多只是假裝聆聽
- 專注力下降
 - Research suggests that people may lose focus or **switch their attention within 8–10 seconds** when something isn't engaging or stimulating enough
- 金句: Eye Catching
 - 謝絕冗長
 - 善用**頭10秒**, 簡潔精要去**震撼** Interviewer → 留下深刻印象
- **目標: Make a Strong Statement**

利用金句: 個人題 Example 1

- What are your greatest strengths?
 - Normal Ans:
 - One of my greatest strengths is my ability to adapt and thrive in dynamic environments.
For example, XXX
 - 金句 Ans:
 - **I consistently delivering results.** XXX → 配合工作經歷/例子 (基本上不太留下印象)
- What motivates you in your work?
 - Normal Ans:
 - I'm motivated by the opportunity to solve challenging problems and see the tangible impact of my work. XXX
 - 金句 Ans:
 - **I'm motivated by exceeding expectations.** XXX

利用金句: 個人題 Example 2

- Why should we hiring you?
 - Normal Ans:
 - You should hiring me because XXX. I have the technical expertise XXX
 - 金句 :
 - First of all, **I always get things done!** XXX
- Describe a challenge you faced and how you handled it
 - Normal Ans:
 - One challenge I faced was when I was managing a project with a tight deadline, and a key vendor unexpectedly delayed a critical delivery. XXX
 - 金句 :
 - **I turn challenges into opportunities.** One challenge I faced was XXXXXXXX

Experience 導向題

Tell me about a time ...

Tech公司Experience 導向題常見題目

- Problem-Solving and Challenges:
 - Solved a difficult problem
 - Had to make a tough decision
 - Faced an unexpected challenge and how you handled it
 - Identified an issue before it became a major problem
 - Had to learn something new quickly to complete a task
- Teamwork and Collaboration:
 - Worked on a team to accomplish a goal
 - Dealt with a conflict within a team
 - Had to collaborate with someone whose working style was very different from yours
- Leadership:
 - Inspired or motivated your team to achieve something
 - Handled a project with limited resources or tight deadlines
 - Had to provide constructive feedback to someone
- Initiative and Results:
 - Took the initiative to improve a process or system.
 - Exceeded expectations on a project.
 - Had to prioritize competing demands
- Failure and Growth:
 - You failed and what you learned from it
 - Took a risk that didn't work out
 - Made a mistake at work and how you fixed it

STAR展示積極行為

- 在回答Exp題時，加入 STAR 法 (Situation, Task, Action, Result) 具體描述你如何積極應對挑戰
 - **Situation** (情境): 描述問題的背景和情境，讓 interviewer 了解 Root Cause 及 Impact
 - In a previous project, I was responsible for monitoring project progress, but due to a supplier's delivery delay, the overall timeline was impacted
 - **Task** (任務): 解釋你在這個情境下的責任或需要達成的目標，讓 interviewer 明白你的動作
 - As the project coordinator, my responsibility was to ensure the project stayed on schedule, so I needed to find a way to mitigate the delay
 - **Action** (行動): 描述你採取的具體行動步驟。要儘量詳細描述你的應對方法和過程，讓面試官了解你如何積極解決問題
 - **I first created a brief plan to assess possible actions. Following the outlined steps**, I reached out to the supplier to understand the cause of the delay. After that, I rescheduled the delivery timeline and adjusted internal resource allocation to minimize the delay's impact
 - **Result** (結果): 展示你採取行動後達到的成果，**最好是具體且可衡量的結果**
 - 最終，我成功將延遲時間縮短至原計劃的 0%，並確保了項目按時完成，客戶對結果非常滿意

緊扣人設

金句 (Strong Statement) + STAR 演繹

- STAR 前面加入金句
- **Q: Tell us about a time when you solved a challenge**
 - **金句:** I always try to turn challenges into opportunities
 - **Situation:** While working at Lyft, we encountered a decline in model performance, which impacted the accuracy of our recommendation system
 - **Task:** My task was to analyze and resolve the performance bottleneck to prevent any negative impact on user experience
 - **Action:** I first created a simple action items list, suggested conducting a performance diagnosis and actively participated in code reviews. Additionally, without being asked, I collaborated with the data team to identify potential data biases
 - **Result:** Ultimately, I optimized the model's feature engineering, which improved the recommendation accuracy by 10% and reduced processing time by 20%
- 盡量壓縮字數, 簡潔為上

金句 + STAR - Experience 導向題 Example 1

- Q: Tell me about a time you dealt with conflict between your teammate

- **金句:** I always aim to understand the root of the conflict before finding a solution
- **Situation:** At Lyft, a disagreement arose between one of the data scientists and a backend engineer over how to handle data transformations. The data scientist wanted the transformations in the model pipeline to ensure better control, while the engineer argued they belonged in the ETL process to reduce latency and improve system scalability
- **Task:** As the lead responsible for driving the project's success, I needed to step in, not only to mediate but also to ensure this conflict didn't delay the deployment
- **Action:** I initiated a meeting with both parties to hear them out individually, and proposed a middle-ground solution by using feature stores to decouple the transformation. This gave both teams what they needed without compromising the project
- **Result:** The team agreed on the approach, and the solution not only resolved the conflict but also optimized the recommendation model's performance by cutting retrieval time by 15%. More importantly, it strengthened trust and collaboration within the team

金句 + STAR - Experience 導向題 Example 2

- Q: Tell me about a time you exceeded expectations on a project

- **金句:** **My goal is ensuring the work I do has a lasting impact**
- **Situation:** In my role as a Google engineer, I was part of a team tasked with optimizing the recommendation algorithm for a key feature. The project timeline was tight, with significant visibility from leadership due to its potential impact on user engagement metrics
- **Task:** While the original goal was to improve the recommendation algorithm's precision by 10%, I identified an opportunity to not only meet the precision target but also enhance system scalability and reduce latency—both critical factors for a seamless user experience
- **Action:** **I started by creating a detailed project plan** that broke down the optimization task into three phases: algorithm refinement, system profiling, and infrastructure adjustments and addressing the problem based on each progress
- **Result:** The project exceeded expectations on all fronts. We achieved a 15% improvement in recommendation precision (50% more than the target). Latency was reduced by 20%

General 情景題

General 情景題 Framework

- General 情景題為虛構題目
 - 用於你未親身經歷的題目
 - Experience題你沒經歷過，直接當成General 情景題
 - 對你不利的Experience題目，直接當成General 情景題
- Tell me a time you failed to deliver a critical task
 - 當成陷阱 → I never failed to deliver, but if i do...
- 答題時著重Framework
 - 盡量有Structure
 - First of all... Second of all... Finally....

General 情景題 Example

- **Q: If you were leading a team and one member was underperforming, how would you address it**
 - **金句:** I believe in addressing challenges directly but constructively
 - **First of all:** I would have a private conversation with the team member to understand their perspective. It's essential to explore if there are any challenges such as unclear expectations, workload issues, or personal difficulties
 - **Next:** I would provide clear, actionable plan, ensuring they understand the specific areas where improvement is needed and why their role is crucial to the team's success. I'd also work with them to set realistic goals and provide any resources or support they might need to succeed
 - **Finally:** I would establish a regular check-in process to monitor progress and provide ongoing feedback. If the performance doesn't improve over time, I'd consult with HR or leadership to explore further steps while ensuring fairness and alignment with organizational policies
 - **By addressing the issue early with a structured plan,** I'd aim to turn the situation into an opportunity for growth—for both the individual and the team

無里頭題

無里頭題

- 主要Based on Interviewer Preference
- 極低機率出現
- 貼近生活, 當作普通聊天
- Examples
 - How do you keep yourself up to date with industry trends and technologies
 - What books, articles, or papers have you recently read that influenced your work or thinking?
 - What do you consider the most important trend or innovation in your industry right now?
- 萬用回答: **Reddit**

最佳時長

盡量不會超過1分30秒，最好壓在1分鐘內

- 留意Interviewer表情
- 有沒有不耐煩
 - 打斷你, even stop你 → 不用panic, 代表Interviewer已經收到想要的information
 - 動態調整, 可加長, 可減短

During Interview - 簡單化

- 真正厲害的人，都擅長把事情「簡單化」
- 不應Involve 太多technical
 - Interview 未必是行內人
 - 不論行內外，能把Technical Concept說清楚十分難
 - 最簡單就是避免太多 technical terms / items
 - 只談經驗，不談技術
- 等待Interviewer指示再去深入

藝術家達文西（[Leonardo da Vinci](#)）說：「簡單，是複雜的極致表現。（Simplicity is the ultimate sophistication.）」，這句話後來也被蘋果創辦人賈伯斯（[Steve Jobs](#)）貫徹在蘋果的經營理念之中；老子的《道德經》中也說：「大道至簡，悟在天成。」；日本經營之神稻盛和夫也曾說過：「高層次的人，善於把複雜問題『簡單化』」，中西方古老智慧都不約而同的表示著：

『成功，就是複雜的事情簡單的做，簡單的事情重複的做。』

Build your script

Amazon Leadership Principles

- [Amazon's Leadership Principles](#) are a set of 16 core values that guide the company's culture
- Behaviorual 天花板, 極具參考價值
- 主力帶出: 如何有力地 Serve customer & Bring Values to the company
 - Internal Customers
 - External Customers

Custom Chatgpt

- 準備幾題BQ
 - 用你的答題語氣, 風格即可
- Fine-tune Chatgpt with your doc and your CV
 - Chatgpt會根據你的風格生成專屬你的 ans
 - 先問fine-tuned chatgpt BQ, 抄低有用的ans
 - 不斷對練, 直至背熟大部分題目

You are a **machine learning engineer** specializing in answering experience and behavioural interview questions.

Simulate the user's style of communication based on provided documents, and respond with relevant answers to interview questions. Use examples from the user's work experience at **Lyft**, or **MunchRE**

Try to embed some Amazon leadership principles concepts into the ans

Reference my job experience, but not the way it talks.

Try to show that i am **well-planned person**

SimulWhen the question type is experience questions, like tell me a time you... You need to ans the question with a strong statement at the beginning and STAR method.

When the question type is hypothesis, like If you encounter You need to ans the question with a strong statement at the beginning and a structure approach with first of all, second of all...

A strong statement is to show who you are, for example, why should we hire you? The statement is "I always get things done"ate the tone and wordings in **behavioral2.txt**, which contains the way I talk.

WORK EXPERIENCE		
ML Software Engineer - Rider Recommendation Lyft, Toronto, ON, Canada Rider Recommendation System	Mar 2024 - Present	
• Built ML models (Collaborative Filtering & LightGBM) to enhance rider's travel experience • Focused on personalized recommendations for various destinations, and handling edge-cases • Led a team of junior engineers in implementing a CTD pipeline using Influx & Docker, ensuring efficient deployment of model updates		
Rider Safety Recommendation and Loss Latency Model		
• Engineered an end-to-end pipeline using GPT-4 & Llama for extracting and summarizing customer feedback and insights • Improved system accuracy by 30% through customer sentiment analysis & Negative Feedback Classification		
Applied Machine Learning Engineer March 22, Toronto, ON, Canada	Jul 2022 - Mar 2024	
• Recommender Loss Latency Model (LLM) - 100% F1 Score • Increased F1 score by 10% by fine-tuning GPT-4 for better results for building the LLM (Value 400, Latency 100ms) for recommendation tasks • Built a neural network architecture with LLM embeddings, handling graph-theoretic to process user data based on customer health signals • Health Score Ranking Model - 90% F1 Score • Built a deep MLP model (50% F1 Score) to process customer health scoring predictions • Validated, cross-validated A/B testing methods, and proposed enhancements to data sources that improved predictive accuracy by 15% • Health Risk Classification • Used Chain of Thought - Time Series Forecasting • Integrated different health signals, sensors, health data, pipeline, Temporal Pattern Model, and evaluation dashboard		
Associate Data Scientist Ottawa Downtown Container Line (ODOCL) Hong Kong	Nov 2020 - Jun 2021	
• Supply Chain Optimization - Demand Forecasting • Designed and built an LSTM-based regression model (MAE=0.05) to perform 400+ customers demand forecast • Business Data Recommendation System - 90% F1 Score • Optimized industry news analysis for better information retrieval and made key news recommendations to business users • Visual Marketing System - Big Data Integration & ML Project • Developed a real-time data pipeline for visual marketing, enhancing operational responsiveness by 10% • Worked with big data environment (Hadoop) to create analytics workflows		
Data Science & Management Trainer Traffic Logistics, Asia Pacific Capgemini, China Project & Transformation Project	Jul 2018 - Oct 2020	
• Developed an ML model for data forecasting, achieving 75% accuracy • Conducted A/B testing for a new supply chain optimization strategy, resulting in a 10% increase in efficiency • Collaborated with the IT department to optimize data storage and retrieval, reducing data access time		
EDUCATIONAL & PROFESSIONAL DEVELOPMENT		
ML Information Technology (AI & Big Data) The Hong Kong Polytechnic University, Hong Kong (GPA: 3.5/4.0) (Ranking: #17 in 2021)	Sep 2019 - May 2021	
• Collaborated with Data Science (DS) & ML • Conducted advanced research in image processing, utilizing FLOW models and Generative Adversarial Networks (GANs)		
BSc (Hons) in Logistics Engineering (AI & Optimization) The Hong Kong Polytechnic University, Hong Kong (GPA: 3.5/4.0) (Ranking: #17 in 2021)	Sep 2014 - June 2018	
• Publications: First Year Research published in Journal of Engineering Research and Application, Rob, W. H., Chung, K. H., Yang, W. K., & Ang, D. T. (2016). Artificial Intelligence of Machine Learning and Its Application

How to Practice?

BQ Training Plan

- 每日花15 - 20 分鐘練習
 - 不停背, 刷chatgpt
 - 可於coding後練習
- 可call chatgpt
 - 直接對話
- 目標:
 - 肌肉記憶, 隨時答到
- 講好英文 – 多聽多講
 - 英文能力真的最重要?
- 注重答題的中心思想
 - Even你用broken english 都可以有效表達你的想法
- Chatgpt live chat
 - Call chatgpt, ask it to be your interviewer
